# Requests from Elba's **Evergreen Cemetery Board**

• The Evergreen Cemetery Board is currently searching for descendants of F.M. Dean who died April 24, 1922, along with descendants of Ada Harp Blue who died Oct. 12, 1924. Anyone with information concerning these individuals or their living family members are asked to contact our Cemetery sexton at 334-389-4458.

• The Evergreen Cemetery Board also reminds families with loved buried at Evergreen Cemetery and Hillcrest Memorial Gardens that any non-affixed items, such as figurines, solar lights, banners, or other memorabilia are not permissible. As we enter the height of the lawncare maintenance season, these items that impede that mowing are subject to removal and disposal by the groundskeeper. We humbly ask any such items be removed from the effected graves immediately. Artificial flowers are welcomed, but must be placed in a permanent holder made of granite, marble, or concrete which secures them in an upright position. Your help with this matter is greatly appreciated. If anyone has questions regarding acceptable items please contact our sexton at 334-389-4458

on Tuesday, April 24, at Enterprise State session per month and are required to to apply for the 2023-2024 class. High a Pea River "Pop Up" Elba History Museum last Saturday, May 6, as part of the Rockin' the River event. There is one of several of the large murals painted by Lamar Rainer Sr., lots of Elba flood photos, and other items on display. Above, retired Elba High School history teacher Jean Helms, right, talks with a youngster that stopped by with his dad to learn more about Elba's history.

# Area Happenings

The Elba Splash Pad is open for the season. Call the Elba Parks and Recreation at (334) 897-6833 for more info.

Local Masonic Motorcycle Riders will conduct a Pulled Pork Plate Fundraiser to, in part, fund Christmas gifts for residents of the Elba Nursing and Rehabilitation Center. The fundraiser will be Saturday, May 20, from 11 a.m. - 2 p.m. at the Elba Masonic Lodge, located across from the Carl Folsom Airport on Larkin Road in Elba. Plates will be carryout only. Suggested donation is \$10 per plate. Any support is greatly appreciated.

The Elba Public Library's Summer Learning Program will be held June 1 - July 28 this year. Registration is underway now. This program is fun for all ages, including adults. For more information, call (334) 897-6921 or email - library@elbaal.gov. Participants can register online at www.elbapubliclibrary.com

# **BRAINSTORMS**

With Ferrin Cox

"Freedom of the press is not just important to democracy, it is democracy." - Walter Cronkite

Our quote this week from the highly respected TV newsman Walter Cronkite, who spent years informing Americans of what was going on, deals with freedom of the press. He was correct that it is democracy in action but in recent years that freedom has been tarnished by abuse. That puts us between a rock and a hard place. We still defend freedom of the press but at the same time have a mental list of abusers of that freedom that need their heads pinched off - or something! Social media, with no controls and no official way to monitor and control it, is largely responsible for the situation, but traditional news outlets are not immune from our share of fault. However we have faith and hope of survival and improvement. History shows that in the early days of this country it was "no hole barred", especially in the political world, as some crazy stuff was published as 'factual' when in fact it was as far out in left field as some of the stuff we see today. Keep the faith folks.

If you ever wonder exactly how the lifestyle of the ultrarich folks differs for that of us regular folks, the following is an example. The Wall Street Journal recently did an in-depth story on the cost of birthday parties for the fiveand-six-year-old children of some of the ultra-rich in Los Angeles, California. They reported the over-the-top parties cost upwards of \$75,000 PER PARTY!!

Can our readers imagine the traffic jam that will be created in Montgomery Saturday morning as Tyson Foods launches their give away of 80,000 pounds of frozen chicken! The company has announced two 'give away' lines for motorist who are asked not to get out of their cars and company employees will put the chickens in their cars. Not only do we predict there will be an awesome mob of motorists fighting for those chickens, but road rage will be wild as well! Then there will be those motorists who will argue for an extra chicken for "Aunt Susie".

We have no positive news to report on the last nibble the City of Elba had on a new industry coming to the area. There is also no reported property purchase that has been recorded at the courthouse on the proposed site. City hall folks don't sound very upbeat on the prospects of the industry, so our suggestion to potential employees is, ed on Hwy 87 (12:03 ing issued (1:11 a.m.); "don't quit our day job . . . . yet".

Be safe, wear your mask when appropriate, social distance, wash your hands AND get the shot(s) and/or boosters (the newest one)!

#### **Upcoming Event at Elba Public Library**

Local pastor Paul Jackson will be at the Elba Public Library on Friday, May 19, at 11 a.m., for a book talk and signing. Jackson co-authored Coaching by Dad: Discover your influence, raise Jesus followers, and build lasting legacy one quarter at a time, with his son, Gabriel.

Elba Career Academy students achieve 100 percent pass rate for CNA testing

by Jayce Jones

Elba Career Academy's Health Science students recently completed their Certified Nursing Assistant (CAN) testing. Students from Elba along with students from the Coffee County Schools [Zion Chapel, New Brockton, and Kinston] are taught health science from the Elba High School Career Academy.

"I was excited to become a CNA because I have always loved helping people and the experience was very helpful in choosing my career for the future," said Elba High School senior Haley Burke.

The exam included a skills test and a rigorous written exam. A total of 25 students participated, and all 25 students passed the

The Heath Science program at Elba Career Academy has 25 brand new CNA's. In addition to passing the exam, students had to complete 90 hours of skills lab and 16 hours of clinical experience at Enterprise Health and Rehabilitation Center.

Kinston High School senior Madison Mitchell also lege? Troy University said she had a very positive experience.

"I decided to become a CNA so that I could make a positive impact on a lot of lives from the young to the 'Neil' (24); daughter-in-law, elderly," she said.

The health science instructor at the Elba Career quin Reauxmance aka Harley Academy is nurse Starla Amison. She is to be commended on a job well done in helping these students achieve a 100 percent pass rate for CNA testing.

These students are the newest CNA's to pass the Elba

Losing a parent is always difficult. Losing your mother is a particularly ifficult subject for many who have lost a parent or guardian. Here are a ew ways to help honor the legacy of your mother, grandmother, greatgrandmother or mother-like figure in your life.
Flowers are a common way to honor mom's legacy. Roses and daises

are beloved favorites to put on a grave, headstone or in a niche or columbarium. Silk flowers are a great alternative to real flowers because of their bright colors, affordable options and their ability to weather al seasons and weather conditions.

Plan a Trip. If there was a place your mother or grandmother liked to go, plan a trip to visit that location. Whether it's an amusement park, zoo r exotic destination planning a trip to honor a legacy is a great way to ease some of the pain of loss. A trip can help not only honor a memory but also help make new positive memories in honor of your lost loved one Support a Cause or Charity. Unfortunately, illnesses like breast cancer diabetes and Alzheimer's claim the lives of far too many women in this country. To honor your mother's legacy, consider donating to a cause or charity that helps provide support, grief resources and research to help others that are going through a similar ordeal. If possible, attend a run or jog to support the cause and help raise awareness. Helping others and socializing with individuals who have been through a related struggle may help some of the grief process.

Today and everyday ... you can honor your mom's legacy in a creative thoughtful and loving way ... we hope these tips can help.

The Elba Ministerial Alliance hosted a National Day of Prayer on May 4th, 2023 led by Rev. Dwight Johnson from Elba First Assembly of God praying for our nation, Rev. Ken Wilson of Westside Baptist Church praying for first responders, Beverly Hamilton of Harris Temple C.O.G.I.C. praying for our churches, Bishop Marvin Luckett of Greater New Zion Missionary Baptist Church praying for our state, Brandon Walker of First Baptist Church praying for our military, Anne Cline of First Baptist Church praying for our schools, Rev. Steve Reneau of Elba United Methodist Church praying for our city and county, and Rev. Kit Johnson of First Baptist Church offering a benediction. The Elba Ministerial Alliance will next be meeting on Thursday, May 18th at 11:45 a.m. at Annie's Restaurant in Elba, and all

clergy are invited to attend.

## **PASTOR'S CORNER**

by Paul Jackson, Pastor **Covenant Community Church** 

Young children can know and love God, too

My youngest son, Gabe, always had a soft heart toward God, even from an early age. He heard often about Jesus, God's special Son, who died for our sins on the cross of Calvary and was raised from death three days later.

I can't begin to tell you the profound joy I felt the day Street, Elba, will host the Those interested in partic-Gabe publicly professed his faith in Jesus as God's Son and his Lord and Savior. What a wonderful privilege to baptize Vacation Bible School dur- Baptist Church can pre-reg-Gabe, celebrating the day he personally said, "Yes!" to Je- ing the week of June 5-9, ister on the Facebook sus Christ. He was eight.

I believe children, even young children, can be taught about God. I would even say they have a God-predisposition put there by God himself, which must be nurtured by is for youngsters ages Pre-K call (334) 897-2520. wise parents.

On one occasion, Jesus addressed the issue of children and their faith in God.

"They asked Jesus, 'Do you hear what these children are saying?' the disciples asked.

'Yes,' Jesus replied. 'Haven't you ever read the Scriptures? For they say, 'You [God] have taught children and infants to give you praise." (Matthew 21:6; cf. Psalm 8:1-3)

What a profound scripture! There's no one right time for children to commit themselves to Jesus Christ as Lord and Savior. God is the One who calls children to himself. The fact that a little child says he believes and wants to express that faith publicly is

surely a sign God has called and they have heard. Whatever you do, don't throw cold water on such a beautiful, beginning flame of faith. Rather, celebrate it! Throw a party. There is much to learn and plenty of growth that lies ahead to be sure, but what a great start to faith, regard-

# **Annual Drinking Water Quality Report January-December 2022** Elba Water Works

The Elba Water Works is pleased to present to you this year's Annual Quality Water Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Elba Water Works has 4 ground water wells producing from the Clayton Aquifer. Elba Water Works also has a back up connection with Coffee County to purchase water, if necessary, we use chlorine for disinfection and we also have 4 tanks with a total capacity of 1.5 million gallons.

We have a Source Water Protection Plan available from our office that provides more information such as potential sources of contamination. A map of the possible contaminate sites is available for viewing at the town hall. I'm pleased to report our drinking water is safe and meets federal and state requirements. If you have questions about this report or concerning your water utility, please contact Melissa Morris at 334-897-2333. We want our valued customers to be informed about their water utility. If you want to learn more, please attend our regularly scheduled meetings held on the second Monday of each month, 5:30 PM, Elba City Hall at 200 Buford Street.

Water & Elect. Board are: Jane Brunson, Chairperson

Carlos Magwood

Julie Holley **Brian Grimes** 

A.R. Williams

Important Drinking Water Definitions:

Action Level (AL) - The concentration of a contaminant that triggers treatment or other requirements that a water system shall follow.

Maximum Contaminant Level (MCL) - The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Elba Water Works routinely monitors for contaminants in your drinking water according to Federal and State laws. This table shows the results of our monitoring for the period of January 1st to December 31st, 2022. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some contaminants. It's important to remember that the presence of these contaminants does not necessarily pose a health risk.

Below is a list of all the contaminants that were detected.

Maximum Contaminant Level Goal (MCLG) - The level of a contaminant

MCLGs allow for a margin of safety Maximum Residual Disinfectant Level (MRDL) - The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition

in drinking water below which there is no known or expected risk to health.

of a disinfectant is necessary for control of microbial contaminants. Maximum Residual Disinfectant Level Goal (MRDLG) - The level of a inking water disinfectant below which there is no known or expected risk health. MRDLGs do not reflect the benefits of the use of disinfectants to

ntrol microbial contaminants. illirems per year (mrem/yr) - Measure of radiation absorbed by the body. phelometric Turbidity Unit (NTU) - Nephelometric turbidity unit is a meare of the clarity of water. Turbidity in excess of 5 NTU is just noticeable to

on-Detects (ND) - Laboratory analysis indicates that the constituent is not

arts per million (ppm) or Milligrams per liter (mg/L) - One part per million rresponds to one minute in two years or a single penny in \$10,000.

arts per billion (ppb) or Micrograms per liter (µg/L) - One part per billion rresponds to one minute in 2,000 years, or a single penny in \$10,000,000. arts per trillion (ppt) or Nanograms per liter (ng/L) - One part per trilcorresponds to one minute in 2,000,000 years, or a single penny in

arts per quadrillion (ppq) or Picograms per liter (pg/L) - One part per radrillion corresponds to one minute in 2,000,000,000 years or one penny \$10,000,000,000,000

cocuries per liter (pCi/L) - Picocuries per liter is a measure of the radio-

tivity in water eatment Technique (TT) - A required process intended to reduce the level

a contaminant in drinking water reshold Odor Number (T.O.N.) - The greatest dilution of a sample with

or-free water that still yields a just-detectable odor. riances & Exemptions - ADEM or EPA permission not to meet an MCL or

reatment technique under certain conditions.

#### eneral Information

Inregulated Contaminan

drinking water, including bottled drinking water, may be reasonably pected to contain at least small amounts of some contaminants. It's portant to remember that the presence of these contaminants does t necessarily pose a health risk. The EPA or ADEM requires us to onitor for certain contaminants less than once per year because the incentrations of these contaminants do not change frequently.

e sources of drinking water (both tap water and bottled water) clude rivers, lakes, streams, ponds, reservoirs, springs, and wells. water travels over the surface of the land or through the ground, dissolves naturally occurring minerals and radioactive material, and can pick up substances resulting from the presence of animals or m human activities.

e're proud that your drinking water meets or exceeds all Federal d State requirements. We have learned through our monitoring d testing that some contaminants have been detected. The EPA is determined that your water IS SAFE at these levels. MCL's are t at very stringent levels. To understand the possible health effects described for many regulated contaminants, a person would have to drink 2 liters of water every day at the MCL level for a lifetime to have a one-in-a-million chance of having the described health effect.

Total Coliform: The Total Coliform Rule requires water systems to meet a stricter limit for coliform bacteria. Coliform bacteria are usually harmless, but their presence in water can be an indication of disease-causing bacteria. When coliform bacteria are found, special follow-up tests are done to determine if harmful bacteria are present in the water supply. If this limit is exceeded, the water supplier must notify the public by newspaper, television or radio. To comply with the stricter regulation, we have increased the average amount of chlorine in the distribution system.

> Lead in Drinking Water: "If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The Owassa/Brownville Water Authority is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at http://www.epa. gov/safewater/lead."

> Some people may be more vulnerable to contaminants in drinking water than the general population. People who are immuno-compromised such as cancer patients undergoing chemotherapy, organ transplant recipients, HIV/AIDS positive or other immune system disorders, some elderly, and infants can be particularly at risk from infections. People at risk should seek advice about drinking water from their health care providers. EPA (Environmental Protection Agency)/ CDC (Center of Disease Control) guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline. All Drinking water, including bottled drinking water, may reasonably be expected to contain at least small amounts of some contaminants. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791). Thank you for allowing us to continue providing your family with clean, quality water this year. In order to maintain a safe and dependable water supply we sometimes need to make improvements that will benefit all of our customers. These improvements are sometimes reflected as rate structure adjustments. Thank you for understanding. We at Elba Water Works work around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future. Carefully follow instructions on pesticides and herbicides you use for your lawn and garden, and properly dispose of household chemicals, paints, and waste oil. Report any leaks or tampering with water lines or hydrants to our office. Phone:334-897-2160. Office Hours: Monday-Friday,8:00a.m.-5:00 p.m.

The Elba Water Works has incurred a Volatile Organic Chemicals (VOC) monitoring non-compliance by failing to collect samples from the Well 6 Treatment Plant during the July - September 2022 monitoring period. ADEM Admin. Coder. 335-7-2-.21(4) states, "Any water system which ... fails to perform required monitoring... shall notify persons served by the system."

MONITORING NON-COMPLIANCE NOTICE

Perfluorobutanesulfonic Acid ND ug/L Perfluorooctanesulfonic Acid ND ug/L

ELBA WATER WORKS IS REQUIRED TO MONITOR YOUR DRINKING WATER FOR SPECIFIC CONTAMINANTS ON A REGULAR BASIS. RESULTS OF REGULAR MONITORING ARE AN I INDICATOR OF WHETHER OR NOT YOUR DRINKING WATER MEETS HEALTH STANDARDS. DURING THE JYLY 2022 - SEPTEMBER 2022 MONITORING PERIOD, WE DID NOT MONITOR FOR VOLATILE ORGANIC CHEMICALS (VOC), AND THEREFORE CANNOT BE SURE OF THE QUALITY OF YOUR DRINKING WATER DURING THAT TIME.

PLEASE SHARE THIS INFORMATION WITH ALL THE OTHER PEOPLE WHO DRINK THIS WATER, ESPECIALLY THOSE WHO MAY NOT HAVE RECEIVED THIS NOTICE DIRECTLY (FOR EXAMPLE, PEOPLE IN APARTMENTS, NURSING HOMES, SCHOOLS, AND BUSINESSES). YOU CAN DO THIS BY POSTING THIS NOTICE IN A PUBLIC PLACE OR DISTRIBUTING

\*Going forward Elba Water Works will guarantee to monitor and collect samples and submit on a timely manner. Elba Water Works has monitored the water since the monitoring noncompliance and guarantees that the water is safe to drink. If you have any questions please contact Melissa Morris at 334-897-2333, Elba City Hall at 200 Buford Street.

# 2023 Annual Drinking Water Quality Report

(Testing Performed January through December 2022)

COFFEE COUNTY WATER AUTHORITY PWSID # AL0001789 401 Davis St E. Elba, AL 36323 Phone 334-897-0150

We are pleased to present to you this year's Annual Water Quality Report. This report is designed to inform you about the quality water and services we deliver to you every day. We are pleased to report that our drinking water meets federal and state requirements.

| Five groundwater wells producing from the Clayton aquifer |

#### Water Quality Protection

In compliance with the Alabama Department of Environmental Management (ADEM), Coffee County Water Authority and the other water systems providing water to us have developed Source Water Assessment plans that help protecting our water sources. All of the assessments were performed, public notification was completed, and the plans were approved by ADEM. If you would like to review the Source Water Assessments, please call our office to make arrangements to view a copy. Please help us make these efforts worthwhile by protecting our source water. Carefully follow instructions on pesticides and herbicides you use for your lawm and garden, and properly dispose of household chemicals, paints, and waste oil. We ask that all our customers help us protect our valuable water sources.

Information about Lead

Elevated levels of lead can cause serious health problems, especially for pregnant women, infants, and young children. However, lead is rarely found in source water. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Your water system is responsible for providing high quality drinking water but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or

Only use water from the cold-water tap for drinking, cooking, and especially for making baby formula. Lead in household water usually comes from the plumbing in your house, not from the local water supply, and hot water is more likely to cause lead to leach from plumbing materials. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available online at <a href="https://www.epa.gov/your-drinking-water/basic-information-about-lead-drinking-water">https://www.epa.gov/your-drinking-water/basic-information-about-lead-drinking-water</a> or by calling the EPA's Safe Drinking Water Hotline at 1-800-426-4791.

#### Questions?

If you have any questions about this report or concerning your water utility, please contact Andrew Shearer at 334-897-0150. We want our valued customers to be informed about their water utility. If you want to learn more, please attend one of our regularly scheduled water board meetings. They are held on the third Monday of each month at 5:30 p.m. at the Coffee County Water Authority office in Elba.

More information about contaminants to drinking water and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline at (1-800-426-4791).

General Information

All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. MCL's, defined in a List of Definitions in this report, are set at very stringent levels. To understand the possible health effects described for many regulated constituents, a person would have to drink 2 liters of water every day at the MCL level for a lifetime to have a one-in-a-million chance of having the described health effect.

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and radioactive material, and it can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.

• Inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban storm water run-off, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.

Pesticides and herbicides, which may come from a variety of sources such as agriculture, storm water run-off, and resi

dential uses.

• Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, and septic systems.

• Radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities.

Radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities. In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the levels of certain contaminants in water provided by public water systems. Food and Drug Administration (FDA) regulations establish limits for contaminants in bottled water.

Some people may be more vulnerable to contaminants in drinking water than the general population. People who are

immuno- compromised such as cancer patients undergoing chemotherapy, organ transplant recipients, HIV/AIDS positive or other immune system disorders, some elderly, and infants can be particularly at risk from infections. People at risk should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

Based on a study conducted by ADEM with the approval of the EPA a statewide waiver for the monitoring of asbestos and dioxin was issued. Thus, monitoring for these contaminants was not required.

#### Definitions

Action Level-the concentration of a contaminant that, if exceeded, triggers treatment or other requirements.

Coliform Absent (ca)- laboratory analysis indicates that the contaminant is not present.

Disinfection byproducts (DBPs)- formed when disinfectants react with bromide and/or natural organic matter (i.e., decaying vegetation) present in the source water. Disinfection byproducts for which regulations have been established include trihalomethanes (TTHM), haloacetic acids (HAAS), bromate, and chlorite.

concentrations of THMs and HAAs.

Maximum Contaminant Level (MCL)- highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Distribution System Evaluation (DSE)- a four quarter study conducted by water systems to identify distribution system locations with high

as feasible using the best available treatment technology.

Maximum Contaminant Level Goal- the level of a contaminant in drinking water below which there is no known or expected risk to health.

Maximum Residual Disinfectant Level (MRDL)- highest level of a disinfectant allowed in drinking water

Maximum Residual Disinfectant Level Goal (MRDLG) - the level of a drinking water disinfectant below which there is no known or expected

risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Micrograms per liter (ug/L) – equivalent to parts per billion (ppb) since one liter of water is equal in weight to one billion micrograms.

Milligrams per liter (mg/L) – equivalent to parts per million
Millirems per year (mrem/yr) – a measure of radiation absorbed by the body.

Nepholografts Turkific Linit (NTLL), a measure of the clarify of whiter. Turkifi

Nephelometric Turbidity Unit (NTU)- a measure of the clarity of water. Turbidity in excess of 5 NTU is just noticeable to the average person. Not Detected (ND)- laboratory analysis indicates that the constituent is not present above detection limits of lab equipment. NR (Not Reported)- laboratory analysis, usually Secondary Contaminants, not reported by water system. EPA recommends that secondary standards be reported but does not require systems to comply. Parts per billion (ppb) or Micrograms per liter (µg/l)- corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.

Picocuries per liter (pCi/L)- a measure of the radioactivity in water.

Running Annual Average (RAA)- yearly average of all the DPB results at each specific sampling site in the distribution system. The RAA,

along with a range, is reported in the Table of Detected Contaminants.

Standard Units (S.U.)- pH of water measures the water's balances of acids and bases and is affected by temperature and carbon dioxide

gas. Water with less than 6.5 could be acidic, soft, and corrosive. A pH greater than 8.5 could indicate that the water is hard. Treatment Technique (TT)- a required process intended to reduce the level of a contaminant in drinking water.

Variances & Exemptions (V&E)- State or EPA permission not to meet an MCL or a treatment technique under certain conditions.

Coffee County Water - Reporting Non-compliance 2022: Coffee County Water Authority incurred a Revised Total Coliform Rule (RTCR) some people may be more vulnerable to contaminants in drinking water than the general population. People who are immuno- compromised such as cancer patients undergoing chemotherapy, organ transplant recipients, HIV/AIDS positive or other immune system disorders, some elderly, and infants can be particularly at risk from infections. People at risk should

period as stipulated by the Department, whichever is shortest."

We did conduct the monitoring for total coliform during the correct time frame and results were in compliance; however, due to lab error, the results were not reported to ADEM before the 10th day of the following month. If you have any questions about this non-compliance or your water quality, please contact Andrew Shearer at Coffee County Water Authority office at 401 Davis St.E. in Elba or by phone at 334-897-0150.

Elba Water Works — Monitoring Non-compliance 2022: Elba Water Works is required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether your drinking water meets health standards During July-September 2022, we did not monitor for Volatile Organic Chemicals (VOC) and therefore cannot be sure of the quality of you drinking water during that time.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, sursing homes, schools, and businesses). You can do this by posting this notice in a public place of distribution expelse by head or entitle.

Going forward, Elba Water Works will monitor and collect samples and submit them in a timely manner. Elba Water Works has monitored the water since the non-compliance and the results were all within compliance with State and Federal regulations. If you have any questions about this violation or monitoring requirements, please contact Melissa Morris at 334-897-2333, Elba City Hall at 200 Buford Street

Below is a table of contaminants for which the Environmental Protection Agency and the Alabama Department of Environmental Management require testing where applicable. These contaminants were not detected in your drinking water unless they are also listed in the Detected Drinking Water Contaminants table elsewhere in this report.

# Views From The Pressbox By Ricky Mularz, Sports Editor

It is hard to believe that our grandson Lawson will walk across the stage at the Elba Elementary School next week as a graduate. It seems like just a few days ago at the Class 1A, Area 2 he walked across after a year in kindergarten, and now high school softball he will walk across the stage for the final time. Can the tournament and posted a world slow down just a little?

#### For what it is worth....

\*\*\* The Elba Lady Tigers punched their tickets to Gulf Shores. the South Region softball tournament last week for the first time in five years and with only two seniors and two the area tournament were juniors on the roster should gain valuable experience to win the tournament and and set the stage for many more successful seasons in the years to come. The Elba girls have a pitching staff that includes two seventh graders and one eighthgrader, while three sophomores also dot the starting line-up on what has to be one of the youngest teams at the tournament. The Lady Tigers have accomplished in five years, and that is something they can be proud of, and will put their own quite an accomplishment

page in the softball history book.

\*\*\* It was also a banner week for three of the other seniors and a pitching staff four high school softball teams in the area as Brantley that includes one eighth and Kinston both won their area tournaments, while Zion Chapel placed second to earn the right to advance. Brantley has to be the team to beat in 1A circles again this season and will be heavy favorites, as always, to bring home the state title. Kinston is much better than anybody realizes and has a solid shot at moving on the from the two area state tournament, as does Zion Chapel, which has a team tournament wins: that is more than capable of beating anybody on any given day. The teams' softball family and fans will log a Elba 16 Florala 3 lot of miles this week to support their favorite teams, but win or lose it will be worth it!

\*\*\* The Brantley Bulldogs may have to buy a new broom after their third straight series sweep in the 1A baseball playoffs. The Bulldogs caught fire late in the season and in the last three weeks have looked like the team everyone expects to see when the players put on the green and white. It is an annual tradition for sports led off the first inning with inning to help the Lady teams at Brantley to play for championships, and this consecutive base hits to Tigers grab an early

\*\*\* The big news last week on the college sports and put the Lady Tigers Richardson and Ana scene wasn't about the transfer portal. It was about on top 4-2, while Emily Caldwell both added base Alabama firing its head baseball coach after he allegedly Richardson blasted a two- hits, and Alayvia Stinson helped a friend land big money on a bet by changing the out grand slam home run added an rbi single as Elba Tide's starting pitcher in a recent loss to LSU. Published in the second to push took command. Destinee of the fourth as kits lead hits, scored 2 runs and had reports are that the Bama coach pulled his starting pitcher just before the game started, while a former high school coach placed a big bet against the Tide in Ohio, and back-to-back rbi upped its lead to 7-1, and run to spark the offensive and had 4 rbi's; Destinee and won big. I don't know if the coach helped anyone singles by Danielle Tidwell the Lady Tigers kept on win some money or if he even knew what was going and Emily Richardson swinging the bats in the Tidwell added a two-run scored 2 runs and had 2 on, but in the world we now live in someone is always extended the Elba lead third as Danielle Tidwell triple and Taylor Day rbi's; Mary Brooklyn looking, and this time fingers were pointed at the former to 13-2 in the third, and and Ana Caldwell both reaches base on a pair of O'Neal added I hit, scored Bama coach.

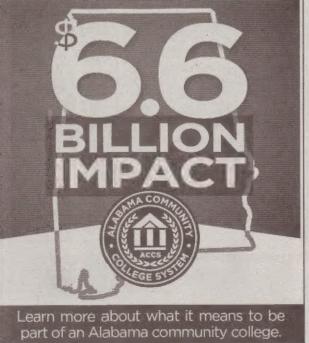

\*\*\* Elba High has started spring football practice and it looks like a lot of players are working hard to get ready for what is expected to be a banner season at Tiger Town. Coach Sieving and his Tigers will have a bullseye on their backs all season and they know it, which means the spring workouts should be just another step toward a season fans are already looking forward to. Don't forget, the spring game will be on May 18 at Tiger Stadium and will include Carroll, of Ozark, and Goshen. I'll admit I am already excited.

\*\*\* In closing.... Z101 is back on the air after a long absence and that means that Elba Tiger football will have a home once again on the radio. The FM station is 101.1 on your dial, just like before, and plays nothing but hit music as it works to regain its fans. Mike Holderfield has spent a lot of time and money to put the station back on the air and I hope everyone in Elba will let him know that is great to have 'Our Own' radio station here in Elba.

Scenes from Rockin' the River held last Saturday in Elba

Restoration 154 and the City of Elba hosted the Rockin' the River event last Saturday, May 6, in downtown Elba. There were lots of activities throughout the day, but the highlight was the Foggy Bottom Cruisin' Car Show presented by the Foggy Bottom Cruisers, a local club for car enthusiasts. All four sides of the downtown square in Elba was filled with cars on display for the car show, and there were makes and models of all kinds. Elba was definitely the place last Saturday for anyone with a love of vehicles. Event organizers said this was the largest Foggy Bottom Cruisin' Car Show to date.

001

The Rabbit Hole hosted entertainment from its outdoor pavilion/sitting area during Rockin' the River. Among the featured entertainers was local resident Rex Oggs
